The 2.6MWp project was developed and funded by Cleantech Solar, a Singapore-based regional developer of rooftop photovoltaic systems. This project was another step in the long-term partnership between Comin Khmere and Cleantech Solar, after the companies completed a 126kWp system for the PPSEZ itself.

Cleantech Solar has completed the development and construction of its 2.8 MW floating solar photovoltaic project located on the reservoir of Chip Mong Insee Cement (CMIC) in Cambodia. The facility is built using the Hydrelion®; Equato technology of Ciel & Terre®; on the first with a 4-in-a-row setup.

The 2.8 MWp floating system is part of a 9.8 MWp PV installation built on site of a cement factory owned by Chip Mong Insee Cement Corporation (CMIC) in Cambodia. The remaining 7 MWp were installed across multiple ...
