

HiNa Battery Technology Co., Ltd is a new high-tech enterprise, concentrating on the R& D and production of the new generation energy storage system-Na-ion batteries. Since 2011, the R& D team has been worked for developing the technology of low-cost, safe and environmentally friendly, high-performance sodium ion battery.

Discover Hina Battery, the world's only company specializing in the mass production of sodium ion batteries. As a leader in advanced energy solutions, we offer cutting-edge sodium ion batteries for grid-scale energy storage and power applications. Explore our innovative technology and join us in shaping the future of energy storage.

In accordance with the strategic agreement between CBAK Energy and HiNa Battery, a dedicated segment of CBAK Energy's sodium-ion battery production line will be allocated for HiNa Battery's use. In return, HiNa Battery will consistently provide CBAK Energy with top-tier cathode materials that exhibit unparalleled stability within the sodium ...

HiNa focuses on low-cost, long-life, high-safety and high-energy density Na-ion battery products. The potential applications cover low-speed electric vehicles, large-scale energy storage, electric vehicles, and national security.

Page 1/2

HiNa Battery Technology (????????????) is a manufacturer of energy storage systems. It offers sodium-ion batteries for electric bicycles, vehicles, communication base stations, data centers, and home energy storage.
