

# Can I build a house by installing photovoltaic panels

Can you install solar panels on your own?

It's possible to install solar panels on your own, but DIY solar installation requires serious know-how and tools. Some solar companies design solar panel kits targeted toward DIYers. However, these kits are often meant for small builds, such as converting a shed, RV, or boat. Installing a solar energy system requires knowledge of electrician work.

Should you buy a home with solar panels?

A home with solar panels has lower electricity bills than an equivalent home without solar panels. Over the life of the solar system, the savings exceed the higher up-front price of the home. Homebuilders can share information with consumers about financing options and incentives described in the Homeowner's Guide to Going Solar.

Should I install solar on my new home?

Slate tiles and cedar shingle roofs are fragile, which means that installing solar on them could require extra equipment (and result in additional costs). If you decide to install solar on your new home before construction is complete, you can also explore building-integrated photovoltaic (BIPV) options like solar roof tiles.

How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.

Do you need an electrician to install a solar panel?

Some solar companies design solar panel kits targeted toward DIYers. However, these kits are often meant for small builds, such as converting a shed, RV, or boat. Installing a solar energy system requires knowledge of electrician work. You'll have to work on your roof and with buried wires.

Can solar panels be installed at the same time as home construction?

A recent study by the National Renewable Energy Laboratory (NREL) found that installing solar at the same time as home construction can significantly cut costs.
