

Can't photovoltaic panels be moved at will

Will solar panels be removed if I move to a new home?

If you're moving locally and within service range of the company that originally installed your solar system, they will likely agree to remove and reinstall the solar panels at your new home.

What happens if you move solar panels outside your service area?

Things get more complicated when you move outside of your solar company's service area. Since they don't operate in your new neighborhood, you won't be able to have them move your solar panels. In that case, you'll either have to move the solar panels yourself or hire a third party to move them for you.

Can I keep my solar panels if I move?

Once our Service Transfer team fully transfers your Sunrun service agreement to the new owner, the home solar installation can stay in the home. What if I want to keep my panels when I move? We're happy to hear that you're interested in keeping your solar system. Here are some things to keep in mind before making a decision: Eligibility.

What happens when you move a photovoltaic system?

If you're moving long distance, the process of uninstalling, transporting, and reinstalling a photovoltaic system yourself will be extremely difficult, risky, and expensive. The company that installed the solar panels on your old home won't be able to help, and your warranty will be voided.

What happens if you move out of state with solar panels?

If you're moving out of state or don't want to take your solar panels with you, your solar lease agreement will be transferred to the new buyers - if they don't agree to take over the lease, though, you'll have to buy out the remainder. Moving out of state with a solar panel lease is a consideration for those planning a move.

Can I move my solar system to a new home?

It's best to use the same company that originally installed your solar panels when moving your system to a new home. The experienced solar technicians from the company will know how to safely remove, transport, and reinstall the solar panels in the most efficient way possible.
