

Who is Canadian Solar?

Over the past 23 years, Canadian Solar has successfully delivered over 125 GW of premium quality, solar photovoltaic modules to customers. Since entering the project development business in 2010, Canadian Solar has developed, built, and connected over 10 GWp of solar power projects and 3.3 GWh of battery energy storage projects across the world.

Where is Canadian Solar made?

Canadian Solar production facilities in Canada, China, Indonesia, Vietnam and Brazil make ingots, wafers, solar cells, solar PV modules, solar power systems, and other solar products. The bulk of Canadian Solar's manufacturing facilities are located in Canada and China. The Ontario plant has a production capacity of over 500 MW per year.

What are some of Canadian solar's projects?

Below are some of Canadian Solar's projects: Recurrent Energy: Canadian Solar completed the acquisition of solar developer Recurrent Energy from Sharp Corporation for approximately \$265 million in 2015. ^ "Q4 & FY Results 2022".

Who is Canadian Solar EMEA?

In 2009, Canadian Solar EMEA GmbH was founded in Munich to serve as Canadian Solar's EMEA headquarter. Having 4 offices and 3 warehouses in Europe, Middle East and Africa region with highly skilled experts from over 50 nationalities representing our team, we are confident to serve our customers more efficiently throughout the EMEA region.

When did Canadian Solar go public?

With the company's acquisition of Recurrent Energy, Canadian Solar's total project pipeline reached 20.4 GW, including an increase in the late-stage project pipeline to 2.4 GW. In November 2006, the company went public (Nasdaq: CSIQ) at \$15 per share.

Is Canadian Solar a bankable company?

Canadian Solar is one of the most bankable companies in the solar and renewable energy industry, having been publicly listed on the NASDAQ since 2006. Over the past 23 years, Canadian Solar has successfully delivered over 125 GW of premium quality, solar photovoltaic modules to customers.

Since entering the project development business in 2010, Canadian Solar has developed, built, and connected over 10 GWp of solar power projects and 3.3 GWh of battery energy storage projects across the world.

Canadian Solar founded (NASDAQ: CSIQ) in 2001 in Canada, with a bold mission: to foster sustainable development and to create a better and cleaner earth for future generations by bringing electricity powered by

the sun to millions of people worldwide.

OverviewManufacturingHistoryAcquisitionsProductsProjectsExternal linksCanadian Solar operates production facilities in the United States, Canada, China, Indonesia, Vietnam and Brazil, where it manufactures ingots, wafers, solar cells, solar PV modules, solar power systems, and other solar products.

Founded in 2001 in Ontario, Canada, the vertically integrated company develops and produces the industry's largest product portfolio, from ingots, wafers, cells and solar modules all the way to custom-made solar systems. Product quality is the global solar company's highest priority.

It is a leading manufacturer of solar photovoltaic modules, provider of solar energy and battery energy storage solutions, and developer of utility-scale solar power and battery energy storage projects.
