This signing marks a pivotal moment in the Turks and Caicos Islands transition towards a sustainable energy future. The contract outlines the installation of five rooftop solar PV systems, with battery energy storage and accessories at the following critical public facilities:

Carbon3 offers specialised services across sectors including social housing, commercial, developer, education, and public sector. From solar PV installations to decarbonisation projects, we deliver expert, energy-efficient solutions.

These rooftop solar PV systems are specially designed for resilience to withstand fierce climatic conditions in the Turks and Caicos Islands. The battery energy storage technology of these systems will provide clean energy to ...

We will continue to work with TCIG to achieve this outcome. Reducing our dependence on imported diesel fuel, expanding renewable energy integration, and lowering the cost of electricity over time are all part of the sustainable energy future we are building for the Turks and Caicos Islands."
