

Will stellantis build a new battery factory in Spain?

For more information go to AFP.com. Car giant Stellantis and Chinese manufacturer CATL said Tuesday they would build a \$4.3-billion factory to make electric vehicle batteries in Spain, the latest bid to boost Europe's troubled EV drive.

Where is CATL based?

CATL, which has received robust financial support from Beijing, has launched two other European factories, in Germany and Hungary. Its chief executive Robin Zeng met late on Monday with Spain's Prime Minister Pedro Sanchez, ahead of the announcement of the 4.1-billion-euro deal.

What happened to CATL batteries?

It announced on November 26 that it was closing a factory at Luton in England with the loss of 1,100 jobs. Founded in 2011 in Ningde, eastern China, CATL produces more than a third of the electric vehicle batteries sold in the world.

Today, at the COP28 in Dubai, European Commission Executive Vice-President Maros Sefcovic, Founder of Breakthrough Energy Bill Gates, and European Investment Bank President Werner Hoyer announced the first two European projects to be supported by the EU-Catalyst partnership: 's FlagshipONE and Energy Dome's Ottana CO2 Battery. ...

4 ???· The parties have agreed to spend EUR4.1 billion (US\$4.3 billion) to build the factory in Zaragoza in northeastern Spain with a capacity to produce 50 gigawatt-hours (GWh) of batteries annually ...
