

Central African Republic back battery for home

Where is Central African Republic launching a new solar park?

BANGUI, November 17, 2023 - Today, the Central African Republic is launching a new 25-megawatt solar park with battery storage in Danzi village, located around 18 kilometers from Bangui. The park will supply electricity to 250,000 persons in the capital, almost doubling the country's electricity generation capacity.

Will Central African Republic have electricity by 2030?

By 2030, almost half of the population of the Central African Republic should have access to electricity, compared to only 16% at present. Today, the Central African Republic is launching a new 25-megawatt solar park with battery storage in Danzi village, located around 18 kilometers from Bangui.

Why is Central African Republic investing in electricity?

With an electrification rate of 35% in Bangui, 8% in the main provincial cities and towns, and only 2% in rural communes, the Central African Republic has invested in the energy sector as an engine of development to increase access to electricity and promote sustainable growth.

In the Central African Republic, the inauguration of a 25MW solar park in Danzi village, equipped with battery storage, nearly doubles the country's electricity generation capacity. Officially inaugurated on 17 November 2023, the solar park is expected to provide power to around 250,000 people in the capital, Bangui.

A solar PV and battery energy storage plant has been commissioned at Danzi, 18km north-west of the capital Bangui, according to the World Bank Group. The plant is a significant addition to CAR's under-developed grid, which had a total of 49.65MW online prior to Danzi's commissioning, according to African Energy Live Data.

In a landmark move toward sustainable development, the Central African Republic has inaugurated a groundbreaking 25-megawatt solar park, equipped with battery storage, situated in the Danzi village, just a short distance from Bangui.
