

Chad is actively seeking collaboration with local and international entities that share mutual interests in driving upstream exploration and harnessing the country's oil and gas resources for added socioeconomic development ...

Today, President Emmerson Dambudzo Mnangagwa is in Hwange for the groundbreaking ceremony of the 720-megawatt power plant being built by Titan New Energy Company. It's a US\$1 billion project that is part of the National Strategy on Energy Efficiency.

The Chad Energy Access Scale Up Project (PAAET) aims to increase access to electricity and clean cooking solutions via expansion of the main power grid and mini-grids, standalone solar systems, deployment of improved stoves, and natural resource management.

Reporting from June 2024 stated that Titan Power was a ferrochrome mining company planning a captive power plant in Hwange. As of October 2024, the 720 MW Titan power station was reportedly slated to be completed by the end of 2025. ... Titan New Energy was reportedly slated to finance the US\$1 billion project fully through internal financing ...

British independent power producer (IPP) Savannah Energy has received approval from the Chadian authorities to build three renewable energy plants with a combined capacity of 500 MW. The plants will supply power to three towns, as well as to oil facilities. Chad's installed electricity capacity is expected to increase over the next three years.

5 ???&#0183; Titan New Energy plans to invest approximately US\$1 billion in establishing a 720 megawatts waste-to-energy power plant in Hwange and a 200MW solar power plant in Gweru, the company has revealed. The project is scheduled for full construction completion and commercial operation by the end of 2028, with an expected annual power output of 5,76 GKWh.
