

Why does Chile need lithium?

For a nation rich in the lithium reserves desperately needed to support the pace of the energy transition, it is critical that Chile adopt strategies that help meet global demand, maximize the benefits for its people, and protect the environment. The world needs lithium--a lot of it--for batteries in electric vehicles (EVs) and electricity storage.

What is Chile's new lithium strategy?

On April 20, the Chilean government announced its new lithium strategy, which plans to give control of the country's lithium industry to the state.

Is Chile 'un-investable' in lithium?

"This over layering of policies and excess of state involvement has made Chile 'un-investable' in lithium," he said, noting that Argentina and Brazil will likely become more significant players compared to Chile over the next decade.

How much lithium will Chile produce in a decade?

The state-developed projects alone are expected to double Chile's output to about 500,000 metric tons of lithium carbonate equivalent by the end of decade, Mining Minister Aurora Williams said on Wednesday. For the remaining 26 salt flats, officials will accept statements of interest through July.

How does Chile benefit from solar energy?

The country benefits from consistently strong winds in mountainous region of Patagonia and some of the world's highest levels of solar radiation in the Atacama Desert. This predictable supply of wind and solar energy has led the Chilean government to estimate that 13% of the world's green hydrogen will be produced within its borders.

What is green hydrogen & how does it work in Chile?

Green hydrogen, a clean energy source that splits water into hydrogen and oxygen using renewable electricity, sits at the heart of Chile's energy transition. Chile's National Green Hydrogen Strategy calls for incorporating green hydrogen into the country's mining and commodity sectors, as well as other carbon-reliant local supply chains.

For a nation rich in the lithium reserves desperately needed to support the pace of the energy transition, it is critical that Chile adopt strategies that help meet global demand, maximize the benefits for its people, and ...
