

Christmas Island's waters are a habitat for threatened green and hawksbill turtles. Green turtles (*Chelonia mydas*) can grow to more than a metre long and live for 80 years. They feed mostly on seagrasses and algae. Hawksbill turtles (*Eretichelys imbricata*) can be easily recognised by their curved, parrot-like beaks, which they use to probe coral reefs for sponges and other soft ...

Covering a total area of 135 square kilometers (of which 63% is covered by incredible flora and fauna in Christmas Island National Park), visitors will need to hire a vehicle in order to get around Christmas Island. There is no public transport, and only 1 taxi firm available. As such if you are wanting to get the most out of your visit, you will need car hire.

Camel Solar Full Plate Absorbers Using the latest technology, Camel Solar produces the newest absorbers without visible welding lines and deformation of the absorber which is commonly seen in most solar thermal collectors. The Camel Solar absorber uses ultrasonic welding technology. This is done on the backside of the absorber.

Christmas is the perfect time to fill your home and outdoor space with sparkling lights that bring warmth and joy to the season. While traditional string lights are always popular, solar-powered Christmas lights are becoming an eco-friendly and cost-effective option. Using solar lights for your decorations this holiday
