

How big is Bulgaria's solar power?

In a matter of months, Bulgaria's total solar power capacity is set to exceed 3 GW, compared to just 1.3 GW at the end of 2021. The lineup in the list of the largest photovoltaic plants is changing almost every week as major facilities come online, and there is more in the pipeline.

What is the biggest solar PV plant to be built in Bulgaria?

This is also one of the biggest solar PV plants to be constructed in Bulgaria in recent years. With the solar PV plant, Aurubis Bulgaria will save some 11.700 MWh per year from grid electricity consumption (sufficient for approx. 12.000 households), which will cover an average of 2.5% of the electricity needs of its smelter facility.

Why are distributed solar PV projects being built in Bulgaria?

Most distributed solar PV projects currently being built in Bulgaria are being configured purely for self-consumption; in other words, they are not connected to the grid, and are being used strictly to reduce the customer's electricity bill. This makes it harder for distribution system operators (DSOs) to monitor, and control.

Is solar PV a good investment in Bulgaria?

It is now economic for commercial and industrial customers in Bulgaria to invest in solar PV projects, without subsidies and without government incentives. As a result, the market for distributed solar PV in Bulgaria is starting to grow.

What should Bulgaria do about solar energy?

The authorities in Bulgaria need to take steps to systematically reduce barriers, fees, and surcharges on small and medium-sized solar PV systems, make it easier to connect to the grid and export the surplus electricity, and create a comprehensive policy and regulatory environment to catalyse investments.

Does Bulgaria benefit from solar power subsidies?

In the last two years, the combined nameplate size of solar power installations in Bulgaria has doubled to more than 2.4 GW and additions peaked this summer. Moreover, in the current top 20, no photovoltaic units built since 2021 benefit from any subsidies, data compiled by Capital.bg showed.

CLS Solar Services is a Bulgarian based company which starts its activities in Blagoevgrad primarily in the field of the construction of solar energy systems for power generation. Over the past six years, the company has established itself ...

Most distributed solar PV projects currently being built in Bulgaria are being configured purely for self-consumption ; in other words, they are not connected to the grid, and are being used strictly to reduce the

customer's electricity bill.

Entra Energy has been investing in renewable energy adding clean, environmentally friendly wind, solar and hydro to support the transformation of the energy system. In 2017 we invested in a LED lighting solutions company in ...

Enery launched its business in Bulgaria in 2020 with the acquisition of the Karadzhhalovo Photovoltaic Power Plant in Plovdiv district. The company's goal is to provide top-quality O& M for its power plants, in accordance with the highest ...

Enery launched its business in Bulgaria in 2020 with the acquisition of the Karadzhhalovo Photovoltaic Power Plant in Plovdiv district. The company's goal is to provide top-quality O& M for its power plants, in accordance with the highest H& S standards.

CLS Solar Services is a Bulgarian based company which starts its activities in Blagoevgrad primarily in the field of the construction of solar energy systems for power generation. Over the past six years, the company has established itself as a reliable and stable partner.
