

The project works as a solar central receiver, consisting of an arrangement of small flat mirrors that concentrate their reflection of solar energy on a tank holding a heating medium. Sun-tracking mirrors (heliostats) on top of the upper bulb reflect solar heat onto a cone-shaped set of smaller mirrors that concentrate these reflections and ...

When it was finished, Pepsi Cola of Klamath Falls had installed the Northwest's largest solar electric system, 172 kilowatts at three locations -- a system that will generate all the energy the facilities will use over the course of a year.

Solar generators help combat climate change minimizing greenhouse gas emissions, mitigating air pollution, and conserving natural resources. Also, it provides sustainable solutions for power needs by replacing the traditional fossil fuel-powered generators because they convert sunlight into electricity thus decreasing air pollution and producing no emissions.
