This article will delve into the issue of power shortages through a practical scenario of a remote farm in Colombia and detail how Better Tech's portable power station WPP1500 provides effective solutions to ensure stable and efficient power supply.

OverviewHistoryElectricity supply and demandAccess to electricityService qualityResponsibilitiesRenewable energy resourcesTariffs and subsidiesThe first historical landmark in the establishment of electric supply dates back from 1928, when Law 113 declared the exploitation of hydroelectric power of public interest. The system worked in a centralized manner, in which vertically integrated state companies maintained a monopoly in their corresponding regions. A public company, ISA, exchanged electricity among the different regional systems.

Background. The Termonorte power plant, which began operating in December 2018, was originally developed by Nencol, then acquired by Axia Energy before being sold to Glenfarne Group in September 2022. The plant is powered by ten 9.3 MW Hyundai internal combustion engines that can run on natural gas or liquid fuels such as diesel.
