

Could foreign companies be involved in Indonesia's solar power growth?

The project was a joint venture between Indonesia's state utility company and Masdar, a United Arab Emirates-based renewable energy company. It highlights the potential for foreign companies to be involved in Indonesia's solar power growth and signals a favourable regulatory and economic climate for investors.

What is Indonesia's solar energy plan?

This progress is part of Indonesia's solar energy plan, which targets 5 GW of installed capacity by 2030. The growth of solar power in Indonesia reflects not just a commitment to shift away from its fossil fuel-dominated energy system but also recognises the immense potential the solar energy holds in the Indonesian archipelago.

Does Indonesia have a potential for solar energy?

Cirata Reservoir floating solar power plant. Source: Solar Industry Indonesia has significant potential for solar energy. However, it has remained largely untapped. The country's 2030 and 2060 decarbonisation goals heavily rely on the industry's rapid expansion. The capacity of solar energy in Indonesia is steadily climbing.

What is Indonesia's Solar Energy Outlook for 2024?

Looking ahead, Indonesia's solar energy outlook for 2024 is promising. While the country's solar industry has historically lagged behind its regional peers, government programs are being implemented to expedite the industry's growth. This will spur private sector involvement and drive up solar energy demand.

What is Southeast Asia's largest floating solar power plant?

These facilities range in size, including Southeast Asia's largest floating solar power plant - the third largest in the world. The floating solar facility came online in November 2023 and is located in the Cirata reservoir in West Java. It currently consists of 13 solar arrays and has a capacity of 145 MW, which is enough to power 50,000 homes.
