

Corporate income tax for solar power generation

Can I get a tax credit for solar energy?

There are two tax credits available for businesses and other entities like nonprofits and local and tribal governments that purchase solar energy systems (see the Homeowner's Guide to the Federal Tax Credit for Solar Photovoltaics for information for individuals):

Can a business take a solar PV tax credit?

The business must have begun or hired a company to begin the construction of a solar PV system before year-end to take the credit. Businesses will need to file Form 3468 on the tax return to claim the credit. Just like individuals, businesses are also able to take the 30% credit from the Inflation Reduction Act to boost tax savings.

Are commercial solar systems eligible for the investment tax credit?

To qualify for the Investment Tax Credit (ITC) for your commercial solar system, it's crucial to understand the expenses that are eligible. Eligibility is based on the overall cost of building the system, and it's calculated by multiplying your "tax basis" (the amount spent on eligible property) by the applicable tax credit percentage.

What is the ITC tax credit for solar panels?

Laid out in Section 48 of the U.S. tax code, the ITC for businesses provides an incentive for investing in clean energy -- one of the key incentives is a dollar-for-dollar tax credit based on the cost of your solar panel system. Through the Inflation Reduction Act of 2022, the ITC was set to 30% of the cost of the system, and extended until 2034.

Which tax credit is best for a solar project?

Factors like project size, financing structure, and available tax credits can influence which credit is a better fit for your solar project. Overall, the ITC is often a more popular option for smaller-scale photovoltaic (PV) and CSP projects because it can be combined with a low-income bonus.

Can a solar business transfer tax credits?

Tax credits carried backward or forward are not eligible for "transferability" (i.e., cannot be sold). If a business does not have a large tax liability, tax equity financing may allow the business to take full advantage of federal tax benefits for a solar system.
