The company's commercially available SiMaxx TM batteries deliver up to 450 Wh/kg and 1,150 Wh/L, with third party validation of 500Wh/kg and 1,300 Wh/L. The company's corporate headquarters is in Fremont, California where it maintains an R& D lab and a MWh scale manufacturing facility for the fabrication of silicon anodes and cells.

This cell uses a silicon-based anode, the working voltage range is 2.4-4.37V, and the cathode is also a high-nickel ternary. However, due to its low voltage, only 3.45V, the specific energy of >500 wh kg battery needs to be more than 65% of the mass of the cathode material.

Key attributes include fast charge capability, long cycle life, and broad temperature range capability in a 400 Wh/kg 780 Wh/L, 17.4 Ah pouch cell. Contact Sion Power to discuss your specific automotive battery requirements ...
