

A similar battery-driven crane has been successfully tested in Sweden; this is proven technology. "Konecranes has been working closely with the Port of San Diego for over 20 years, and we're delighted that the first all ...

Only after a battery passes this process can it be used in the fleet; that process is extremely costly, and is time consuming. For instance, if you were to certify a cell phone battery--testing would be quick, easy, and if the battery was destroyed in testing it's not a big deal. That's where this project comes into play."
