

How much money does Croatia need to install solar power in 2022?

The Croatian government has allocated EUR60 million (\$65.6 million) in subsidies for businesses to install 80 MW of renewables and 20 MWh of batteries. Croatia may only install 2.5 MW of PV in 2022.

Did Croatia get the green light for IE-energy's massive energy storage project?

Croatia got the green light from Brussels for a EUR 19.8 million grant to IE-Energy for a massive energy storage project.

Will IE-energy accelerate the decarbonization of Croatia's energy sector?

In addition, it will accelerate the decarbonization of the Croatian energy sector, according to the announcement. IE-Energy is based in Rijeka, Croatia's fourth-largest city. It joined the intraday and day-ahead markets at the Croatian Power Exchange (CROPEX) last year. Documents reveal the project is scheduled to start on December 1.

Croatia will provide some EUR500 million (US\$534 million) in subsidies for battery energy storage system (BESS) technology, a government minister has said. Minister of Economy and Sustainable Development Damir ...

The battery storage system provides energy balancing and maintains grid stability on the island of Vis. The system operates on Li-ion batteries which enable rapid response, both in the terms of energy delivery requirements and for the purpose of storing electricity generated from either Vis SPP or the power grid.

The deadline for submitting proposals is 19 June, 2023, and the Call page indicated that the energy storage technology must be battery-based. In September 2020, Energy-Storage.news reported on a EUR20 million grant from the EU to Croatia-based energy storage operator IE-Energy for the firm to deploy projects in the country.
