

Who is nes Ltd?

NES Ltd is the first Bulgarian producer of solar appliances. Today, the portfolio comprises solar collectors, water heaters, boilers and PV modules. NES company is a Bulgaria based OEM specialised in the renewable energy appliances production.

What is Cuba's energy policy?

In 2014, the Cuban government approved a "Policy for the development of renewable energy sources and efficient energy use by 2030", which aims to gradually reduce the use of fossil fuels and sets a target for 24 percent of energy to come from clean sources by that year.

Where does Cuba's electricity come from?

The rest of Cuba's electricity comes from local liquefied petroleum gas (nearly eight percent), renewable sources (five percent) and three percent from floating units (patanas), which also use fossil fuels, in Mariel Bay, 45 km west of Havana.

How much power does IPS Cuba have?

CREDIT: Jorge Luis Baños/IPS Cuba has an installed potential of more than 6500 MW/h, but the real generation capacity is only half of that, and when several generator units are disconnected from the National Electric System (SEN), it is impossible to meet peak demand of 3300 to 3500 MW/h.

Why is Cuba facing a power crisis?

HAVANA, Oct 14 (IPS) - With aging infrastructure and problems with fuel supplies, Cuba is facing a crisis in its electric power generation system, which could accelerate plans to increase the share of renewable sources in the energy mix. In recent weeks, blackouts have been widespread in the 15 provinces of this Caribbean island nation.

Why is the US threatening fuel companies in Cuba?

"The U.S. government has dedicated itself to threatening and blackmailing companies that supply fuel to Cuba, and this is a qualitative leap in the intensification and application of unconventional measures against those involved in international transportation, without any legal or moral authority," stated the 2020 annual report on the embargo.
