

Why is Cyprus preparing a liquefied natural gas terminal in Vasilikos?

Cyprus aims to conclude construction works for the Liquefied Natural Gas (LNG) terminal in Vasilikos by the end of 2024 as this would assist the efforts to reduce electricity generation costs. Minister of Energy George Papanastasiou said on Monday.

What is Cyprus' costliest energy project?

Billed as Cyprus' costliest energy project, it was the crude-dependent island's first important step to transitioning to cleaner, cheaper natural gas for energy generation. The government had said the terminal would cut power generation costs by 15%-25% and reduce Cyprus' carbon footprint by 30%.

What is Cyprus' liquefied natural gas terminal?

The terminal features a tanker ship built in Singapore and refitted to convert liquefied natural gas back into gaseous form to use in Cyprus' main power plant. It also includes a jetty and pipelines to convey the gas to the nearby Vasilikos power plant.

Who drills for oil and gas in Cyprus?

ExxonMobil, Chevron, Italy's Eni and French Total are all licensed to drill for oil and gas off Cyprus' southern coastline. The terminal features a tanker ship built in Singapore and refitted to convert liquefied natural gas back into gaseous form to use in Cyprus' main power plant.

Why did a Chinese consortium pull out of a contract with Cyprus?

NICOSIA, Cyprus (AP) -- A Chinese-led consortium on Thursday pulled out of its contract with Cyprus to build the island nation's first natural gas import terminal over what it says was the Cypriot government's failure to pay what it owed for work completed this year.

Can Cyprus drill for natural gas?

Cypriot officials also said it would allow for future use of natural gas from fields discovered in waters off Cyprus. ExxonMobil, Chevron, Italy's Eni and French Total are all licensed to drill for oil and gas off Cyprus' southern coastline.

According to the national action plan Cyprus expects it will also meet this target. [3] According to the IEA key statistics for 2010, Cypriot energy imports in 2008 were 5 TWh higher than the primary energy use. If correct, this corresponds to about 18% storage capacity of the annual energy use. There was an equal imbalance in 2007. [2]

The long-running saga of Cyprus' LNG import terminal has recently taken a new twist with the Chinese-Greek consortium led by CPPE (China Petroleum Pipeline Engineering) - subsidiary of Chinese state giant CNPC - going public with its complaints ...

The benefits of renewable energy should be felt not only by the businesses that produce it but by every resident of Cyprus. We partner with every household, farmer, property owner, and community to promote energy autonomy and independence in green energy production and storage through renewable sources and advanced technologies, fostering social cohesion.
