

How can CEE countries meet net-zero emissions goals?

The EU has called on countries of central and eastern Europe (CEE) to do more to meet its 2050 net-zero emissions goals. Based on an assessment of national energy and climate plans, CEE countries need to boost their potentials for efficient use of energy.

How much of Czechia's plan will foster the digital transition?

23% of the plan will foster the digital transition. The transformative impact of Czechia's plan is the result of a strong combination of reforms and investments which address the specific challenges of Czechia.

How does the Czech government support the environment?

Other important sources of support for the environment include the Modernisation Fund, the Just Transition Fund, the Czech government's recovery plan, the New Green Savings Programme (funded by the recovery plan) and the EU's LIFE Programme - a funding instrument for the environment and climate action.

Can Czechia use electricity grid capacity more efficiently?

Czechia has significant unused potential for using electricity grid capacity more efficiently. The objective of this reform is to improve the use of available electricity grid capacity and to facilitate the connection of renewable energy sources to the grid and self-consumption..

Does Czechia have a repowereu plan?

Czechia's plan now includes 15 reforms and 9 investments to reduce its reliance on fossil fuels, in line with one of the REPowerEU Plan's objectives. To finance this increased ambition, Czechia has asked for its Brexit Adjustment Reserve to be transferred to the plan, amounting to EUR55 million.

How does the repowereu plan improve the sustainability of Czech forests?

The investment in forestry management aims at increasing sustainability of Czech forests for EUR335 million. The modified plan, including the REPowerEU chapter, has further strengthened the focus on the plan on the green transition, devoting 43% of the available funds to measures that support climate objectives (up from 42% in the original plan).
