

A coal-fired power plant in the Czech Republic receives energy through an igus e-chain. This plastic cable carrier, which has continuously been in operation for ten years, ...

Compared to the previously installed festoon systems, e-chain systems of the 5050RHD series reduce the necessary cable lengths and the installation space needed. The 5050RHD series is used in the large lignite excavator in the Czech Republic.

Polymer energy chains for every movement. Filter according to dimensions, load and dynamic data and get the result quickly. A pre-selection of recommended energy chains makes it easier to find and supply energy in your application. Experts can find a total overview of all igus energy chains on the right.

Faster designing of energy chains with 3D CAD Without registration and completely free of charge. Quickly download CAD models of energy chains in various file formats. Also for rotary and circular movements, long travels and accessories. Further information

A coal-fired power plant in the Czech Republic receives energy through an igus e-chain. This plastic cable carrier, which has continuously been in operation for ten years, travels over 2,017 feet.

plastic-energy chain in comparison to cable trolleys. In this white paper you can find the following topics: Advantages and disadvantages of energy chain systems and festoon systems for steel ...

1:11 6 days ago All New! Smart Plastics EC.W Indicator. Learn about the brand new EC.W wear indicator for e-chain systems in this video. e-chain Product Manager Rob Mammone shows off the indicator, explains how it works, and even gives a demonstration of the color-changing wear indicator in action.

A "stacker" is required to automatically stack the coal on the stockpile. The CEZ Group opted for one of our plastic energy chain systems to ensure that this is reliably supplied with energy, ...

A "stacker" is required to automatically stack the coal on the stockpile. The CEZ Group opted for one of our plastic energy chain systems to ensure that this is reliably supplied with energy, data and media over a distance of 615 metres.
