

Who is Congo energy?

Exclusive distributor of PRAMAC products in the DRC, Congo Energy offers a wide range of reliable and efficient generator sets. Our energy solutions cover various sectors, from light industry to specific infrastructures such as health and data centers. Thanks to our expertise, we offer tailor-made solutions and efficient after-sales service.

Who makes Nordex wind turbines?

Since the merger with Acciona Windpower in 2016, the Nordex Group has become a global player and one of the world's largest wind turbine manufacturers. The Group offers highly efficient and competitive wind turbine systems, which enable long-term economical power generation from wind energy in all geographical and climatic conditions.

Why should you choose Nordex group?

The global trend toward renewable energy is moving forward - and the Nordex Group is an essential part of this. Our focus is on making renewable energy as cheap as possible, and that means to continuously reducing the cost of energy (COE) from newly-installed wind power turbines.

What certificate does Congo energy have?

Congo Energy has the certificate issued by ARSP (Autorit  de R gulation de la sous-traitance dans le secteur priv ). This certificate certifies that Congo Energy is authorized to work as a subcontractor in the Democratic Republic of Congo. Congo Energy strives to provide its partners and customers with high-quality products and services.

Who is the Nordex group?

Founded in 1985, the Nordex Group has a proven track record of launching industry-leading products - starting when we pioneered in the mass production of 1 MW turbines (1995), when we were first to enter the 2.5 MW class (2000) or launched the first 4+ MW class turbine, the N149/4.0-4.5, in 2017.

Where is Nordex located?

The company has offices and branches in more than 30 countries. The holding company, Nordex SE, is listed on the TecDAX and MDAX of the Frankfurt Stock Exchange (ISIN: DE000A0D6554). The headquarter of the company, with the Management Board and central corporate functions, is located in Hamburg, while the legal entity is registered in Rostock.

NORDEX ENERGY SOUTH AFRICA LTD. (NESA) The Nordex Group has been present in the South African market since 2010, and is the proud market leader, with a 32 percent share of the total installed wind power capacity in the region. As part of this, the Group boasts an impressive total installed capacity of more than 1100 MW since October 2022.

Congo Energy is a Congolese company which is contributing to the recovery and development of the energy sector in the Democratic Republic of the Congo (DRC). Congo Energy offers products that reduce consumption while optimising the quality of installations.

A 200MW solar plant project is set to be constructed in Democratic Republic of Congo (DRC). Soleos Energy, an Indian renewable energy developer, and Melci Holdings, a specialist in electrical engineering inked a deal to launch the project.

Congo Energy is a Congolese company which is contributing to the recovery and development of the energy sector in the Democratic Republic of the Congo (DRC). Congo Energy offers products that reduce consumption while ...

Congo Energy is a Congolese company which is contributing to the recovery and development of the energy sector in the Democratic Republic of the Congo (DRC).. Congo Energy offers products that reduce consumption while optimising the quality of installations.. What we do. The company focuses on 4 areas: Electrical infrastructure for industries.

German wind turbine manufacturer Nordex has announced that it has won a new order in South Africa. This new 336 MW contract will challenge Denmark's Vestas, which has established itself in this dynamic and competitive market in recent years.

This map provides a detailed view of energy infrastructure across DR Congo. The locations of power generation facilities that are operating, under construction or planned are shown by type - including liquid fuels, natural gas, coal, hybrid, hydroelectricity, solar and methane. Generation sites are marked with different sized circles to show sites of 1-9MW, 10 ...

The project is expected to be fully operational in 18-24 months, Adler said, adding that the project will have a direct and indirect impact of \$700 million to the African country's GDP.
