Solar power is our passion. The experienced team at Eastern Power Solutions is dedicated to fulfilling the needs of the client. Eastern Power Solutions prides itself for its ability to provide clear communication with its clients, guaranteeing safety and productivity, and working diligently to bring their visions to life.

When working on a recent project for a customer requiring additional power on one of its oil platforms, a power supply expert encountered a rather considerable challenge that needed to be overcome. The main electrical power supply to the platform is imported over 40km from a third-party operator's facilities through a 33kV subsea cable link.

Dale Power Solutions is one of the UK's largest suppliers of uninterruptible power supplies (UPS) and emergency backup generators. We offer a wide range of commercial and industrial power supply products to suit a variety of industries. We also provide complete asset life-cycle management with our service and maintenance support for UPS and ...

We're here to keep your power running no matter what, whether you have a single site or a UK-wide portfolio. At Dale, we supply and maintain an extensive range of uninterruptible power supplies (UPS), commercial and industrial generators, and energy storage systems.

**Industrial UPS.** Industrial UPS are specifically designed for critical processes such as an oil rig or power plant but are also suitable for manufacturing when a break in production can be costly. They won't drop the critical load and can tolerate higher temperatures and dirtier environments. Industrial UPS have a design life of 20+ years with a corresponding battery life.

Dale Power Solutions supplies secure power solutions to all major UK and international market sectors. We offer an extensive range of products and services, including the supply and upgrade of all types of diesel and gas-turbine generators, and UPS systems.

The Satala plant is designed to withstand the challenges that American Samoa can present, including earthquakes, typhoons, flooding, high humidity and corrosive salt air. Other new features include the plant's new higher elevation on engineered fill, an eight-foot flood wall with water-tight flood doors, and acoustic noise reduction measures.
