

How AutoCAD is used in solar PV design?

AutoCAD is a computer-aided design (CAD) software that when used in solar PV design, allows solar designers and engineers to create precise 2D and 3D CAD solar panel drawings, plant layouts and blueprints to help in the process of solar installation.

How to design a solar PV system?

When designing a PV system, location is the starting point. The amount of solar access received by the photovoltaic modules is crucial to the financial feasibility of any PV system. Latitude is a primary factor.
