

# Detailed explanation of the method of photovoltaic bracket

Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel, PVMars will definitely recommend it to you, and effective solutions are based on solar panels' characteristics and your on-site installation environment.

What is a fixed adjustable photovoltaic support structure?

In order to respond to the national goal of "carbon neutralization" and make more rational and effective use of photovoltaic resources, combined with the actual photovoltaic substation project, a fixed adjustable photovoltaic support structure design is designed.

What is the difference between a thermoelectric and a photovoltaic?

Thermoelectrics\*\*: Visible sunlight converted into heat; temperature difference between leads drives an electrical current. Long- PV: Visible sunlight converted into heat, which powers IR-responsive photovoltaic devices. Hybrids Possible (e.g., combined cycle power plant): The above, in tandem with another fuel (e.g., natural gas).
