

What is Energas & AES Dominicana's vision for a sustainable future?

Energas and AES Dominicana shared a vision for a sustainable future in the Dominican Republic by diversifying the country's energy matrix with greener energy solutions while ensuring a strong, resilient grid.

Where is Energas located in the Dominican Republic?

Energas is a major electricity generator in the Dominican Republic through the 300 MW San Pedro de Macor's Electricity Company (CESPM) power plant, located in the Eastern region of the country.

How much power will the Dominicana Azul solar farm produce?

The Dominican national energy commission CNE said that the solar farm will have a BESS of 24.8 MW of power and 99.2 MWh of storage capacity. The Dominicana Azul plant will be capable of producing around 176.4 GWh of electricity annually for the national grid. Zenith Energy will build the facilities in the Cabrera municipality.

Is Zenith launching a solar farm in the Dominican Republic?

Source: Comisión Nacional de Energía () Zenith Energy Corp SRL, a subsidiary of Blacktree Capital Management, has initiated construction of the 101.2-MWp Dominicana Azul solar farm in the Dominican Republic, launching a project that will boast the Caribbean nation's first battery energy storage system (BESS).

Does Energas use natural gas in Dominicana?

Through AES Dominicana, we introduced natural gas into the country over 20 years ago, saving our customers over half a billion dollars and avoiding four million tons of CO₂ emissions every year. However, the Eastern region of the country where Energas' facility is located lacked existing natural gas networks or pipelines to transport natural gas.

Does the Dominican Republic need a natural gas infrastructure solution?

However, the Eastern region of the country where Energas' facility is located lacked existing natural gas networks or pipelines to transport natural gas. The Dominican Republic needed a holistic infrastructure solution to strategically shift from conventional generation to natural gas.

Dominican Republic power utility ETED selects CG's smart grid solution for substation automation of seven substations. ... part of Clarion Events Group PO Box 1021, 3600 BA Maarssen, The Netherlands Main switchboard: +31 346 590 901 Smart Energy International is the leading authority on the smart meter, smart grid and smart energy markets ...

As the Dominican Republic's most comprehensive digital steam plant, Central Termoelétrica Punta

Catalina (CTPC) will use GE's software to help CDEEE operate the plant reliably and achieve better performance over its lifetime.

The Dominican Republic is aiming to generate 25% of its electricity from renewable sources by 2025, as part of its commitment to energy diversification. Solar energy will spearhead this transition, with penetration expected to grow from 8% to 17% within a year.

The Dominican Republic is one of the Caribbean's hottest clean energy markets. After years of slow growth, the utility-scale market is in an upswing, with successful financing and construction for a number of high profile wind and solar projects.

The Dominican Republic needed a holistic infrastructure solution to strategically shift from conventional generation to natural gas. Combining our respective relationships, expertise, and innovative strategies, we partnered through a new joint venture, EnaDom, to transform the country into a cleaner, more reliable energy matrix.

The Dominican Republic is rapidly integrating renewable energy sources into its national grid. By 2025, they aim to achieve 25% renewable energy dependence. This ambitious goal has spurred significant growth, with renewable energy contributing nearly 19% of the country's total energy demand in 2023.
