

Is solar energy a viable resource for the Dominican Republic?

High solar potential, along with integrating efficiencies and economies of scale, can make solar energy a viable resource for the Dominican Republic. Similarly, wind energy has strong potential, particularly in the southwest.

How many solar panels are used in Dominican Republic?

For the construction, which has had an investment of 93M USD, a total of 147,870 solar panels were used. The project helps Dominican Republic to reach its goal until 2025, the year in which they expect 25% of the electricity consumed by the country to come from renewable energies, and has generated more than 500 direct jobs in the region.

Why did the Dominican Republic build a photovoltaic plant?

The energy deficit and dependence on fossil fuels drove the Dominican Republic to step up its commitment to clean energy. DOMINION took on the task of building the photovoltaic plant in this Caribbean country, with an offer that included everything from the design and construction of the plant to its operation and subsequent maintenance.

Why did the Dominican Republic start a solar park in 2022?

On 2022, DOMINION completed the commissioning of El Soco photovoltaic solar park in the municipality of Consuelo, Dominican Republic. The energy deficit and dependence on fossil fuels drove the Dominican Republic to step up its commitment to clean energy.

Where is Parque Solar re-EWD located?

Renewable Energy World Dominicus' Parque Solar R.E.W.D., which will also have a nominal capacity of 50 MW, will be developed in the municipality of Villa Hermosa, in the province of La Romana, east of the capital city of Santo Domingo.

Where is Planta Solar photovoltaica Payita 1 located?

LCV Ecoener Solares Dominicana's Planta Solar Photovoltaica Payita 1 will have a nominal capacity of 50 MW and will be located in the Payita area of the Nagua municipality in the country's northeastern Maricao; a Trinidad Sánchez province.

For the construction, which has had an investment of 93M USD, a total of 147,870 solar panels were used. The project helps Dominican Republic to reach its goal until 2025, the year in which they expect 25% of the electricity consumed by the country to come from renewable energies, and has generated more than 500 direct jobs in the region.

President Luis Abinader is set to lead the groundbreaking ceremony for the "Dominicana Azul" photovoltaic solar project this Friday. Developed by the Canadian company Azul Zenith Energy Corp, SRL, this significant

clean energy initiative is expected to create over 900 direct jobs in the Dominican Republic.
