

Drip irrigation enhances the yield & so, the profitability. So, the investment of solar pump is recovered faster.  
[Skip to content New Drip Irrigation Tech: Economical Energy Efficient Low ...](#)

Discover how Aptech Africa's renewable energy solutions are transforming Guinea's energy landscape. Learn about the installation of solar minigrids in Bolodou and Thianguel Bori, empowering communities and enhancing socio-economic development.

The German company is currently working on an 82 MW solar project in Guinea, one of the largest independent solar power production projects in the West African region. The project, spread over two sites, will bring clean and cost-effective energy to the port city of Kamsar via a mini-grid with 12 km of grid extension and to the city of Boké; ...

GuineaSolar is a turnkey Solar Power Systems integrator. At GuineaSolar we consider everything - from the environment right through to your operational costs and bottom line. We focus on complete solar PV plants that are custom ...

One of the promising solutions that have been gaining traction in Guinea is the installation of PV (photovoltaic) minigrids. Aptech Africa recently designed, supplied, installed and commissioned two (2) of 103.4kwp and ...

One key advantage of solar energy in Guinea lies in its constant availability. The country enjoys stable solar irradiation, allowing for reliable electricity production throughout the year. This not only contributes to energy security but also reduces greenhouse gas emissions, aligning Guinea on the path toward sustainable development.

Drip irrigation enhances the yield & so, the profitability. So, the investment of solar pump is recovered faster.

The German company is currently working on an 82 MW solar project in Guinea, one of the largest independent solar power production projects in the West African region. The project, spread over two sites, will bring clean and cost ...

One of the promising solutions that have been gaining traction in Guinea is the installation of PV (photovoltaic) minigrids. Aptech Africa recently designed, supplied, installed and commissioned two (2) of 103.4kwp and 21.45kwp with a battery bank storage of 192kwh and 33.6kwh respectively in Guinea.

How Drip Irrigation compliments Solar Pumps? Drip irrigation Drip irrigation enhances the yield and hence

the profitability. So, the investment of solar pump is recovered faster Drip Irrigation saves 50% water. Thus, same pump can irrigate double the area! Flood irrigation Incredible Benefits of Drip Irrigation 50% Water Saving 30%

Aptech Africa has launched two photovoltaic mini-grids in Guinea to improve energy access in a country where only 30% of the population has reliable electricity. The installations include battery storage systems of 192 kWh and 33.6 kWh respectively.

GuineaSolar is a turnkey Solar Power Systems integrator. At GuineaSolar we consider everything - from the environment right through to your operational costs and bottom line. We focus on complete solar PV plants that are custom designed to your needs. Our plants are optimized to maximize the benefits of solar.
