

The Ministry of Infrastructure is drafting a plan to install a new 1,000MW (1 GW) solar PV capacity in Slovenia with the support of the national transmission system operator (ELES) and the distribution system operator SODO.

Solar cells are a direct converter of solar energy into electricity. Sunlight falling on a solar cell causes the movement of electrons in it, resulting in a direct electric current. But as this cannot be used in home appliances, we must first convert the direct current to alternating current.

Eagle Solar is an American solar company based on 12 years of experience in the development of utility scale solar projects. Our ambition is to bring utility scale solar to all regions of the world. Today solar energy is the cheapest and fastest way to ...

Regarding solar energy, the Prime Minister said that although the sun is billions of units older than any beginnings of human civilisation, we have only been able to use solar energy for a few short years.

At the end of 2017, 4,231 photovoltaic power plants had been installed in Slovenia with a total power of 267 MW. Parliament and Government are in the process of adopting or have already adopted several amendments to the energy legislation related to renewable energy.
