

En Ecuador ofrecemos una variedad de paneles solares que se ajustan a diferentes necesidades. Dependiendo de tu consumo energético, el espacio disponible y tus objetivos, nuestros expertos te recomendamos la mejor ...

Esta característica geográfica coloca a Ecuador en una posición única para aprovechar una de las fuentes de energía más limpias, sostenibles e inagotables disponibles: la energía solar ...

A photovoltaic solar energy system can keep your home running during outages and lower your energy bills. But what type of system does it require, and how much will the installation cost? Solar energy systems are most effective in areas with high sun exposure. Ecuador, with its diverse geography, offers varying solar potential based on location.

These solar distributors are the ones who deal with homeowners who want to go solar, businesses that work with the solar industry and solar installers who offer solar system services to both residential and commercial customers.

Esta característica geográfica coloca a Ecuador en una posición única para aprovechar una de las fuentes de energía más limpias, sostenibles e inagotables disponibles: la energía solar fotovoltaica. Ecuador recibe, en promedio, una irradiación solar que puede superar los 4.5 kWh/m²; por día en amplias regiones del país.

We sell 120 and 240 watt solar panels, deep-cycle batteries, cables, fuses, solar charge controllers (MPPT and PWM), and anything else needed to create an off-grid, mobile and/or backup power system. And we ship to Ecuador for the lowest price possible! Make a conscious decision to reduce the size of your environmental footprint today.

En Solar Ec comercializamos, instalamos y mantenemos sistemas de energía solar fotovoltaica modulares, escalables, interconectados a precios asequibles y al mismo tiempo somos amigables con el medio ambiente.

I always wanted Solar power, because Ecuador is... well... in the equator, so we get A LOT of nice, stable sunlight (almost 12h a day, every day). At first I started quoting with local providers, but the quotes have exaggerated values (like 5000 USD for a 3000W with 4800Wh, with NO solar panels as they quoted those in additional 5000 USD).

A photovoltaic solar energy system can keep your home running during outages and lower your energy bills.
