

Uzņemums "Energiapartner" solas but noderīgs palīgs, uzstādot saules panelus, iekārtojot elektromobilu uzlādes stacijas, uzstādot akumulatoru uzglabāšanas sistēmas vai veicot energoauditus.

Latvia is a net energy importer. Primary energy use in Latvia was 49 TWh, or 22 TWh per million persons in 2009. In 2018, electricity consumption per capita was 3731 kWh. Latvia has adopted the EU target to produce 50% of its energy from renewable sources by 2030.

This Energy Policy Review was prepared in partnership between the Government of Latvia and the IEA. It draws on the IEA's extensive knowledge and the inputs of expert peers from IEA member countries to assess Latvia's most pressing energy sector challenges and provide recommendations on how to address them, backed by international best ...

Die vorliegende Stromspeicherstrategie formuliert die Absicht, zu prüfen, ob § 8 EEG (Netzanschlussvorrang für „Grundstromspeicher“) auf alle Energiespeicher ausgeweitet ...

Rolls-Royce has received an order from the Latvian transmission system operator Augstsprieguma tīkls (AST) to supply a large-scale mtu battery storage system to secure the Latvian power grid. Together with the other Baltic states, the country will synchronize its energy supply system with the continental European power grid in 2025.

Im EEG wird in § 61 Absatz 1 EEG auf den Zweck des technischen Vorgangs abgestellt: „Für Strom, der in einer Saldierungsperiode zum Zweck der Zwischenspeicherung in einem elektrischen, chemischen, mechanischen oder physikalischen Stromspeicher verbraucht wird...“

Based on the Baltic Reserve Capacity Market Study conducted by AST together with the Baltic transmission system operators Litgrid AB and Elering AS, within which possible availability and development scenarios of the reserves were assessed, it was concluded that in Latvia, it is important to install and operate storage facilities both from the ...

Latvia is a net energy importer. Primary energy use in Latvia was 49 TWh, or 22 TWh per million persons in 2009. [1] In 2018, electricity consumption per capita was 3731 kWh. [2] Latvia has adopted the EU target to produce 50% of its energy from renewable sources by 2030. [3]

In Latvia, developer Utilitas Wind announced the official opening of a 10MW/20MWh battery energy storage system (BESS) last week (1 November) in Targale, a village in Latvia's north-eastern Ventspils region.

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

Die vorliegende Stromspeicherstrategie formuliert die Absicht, zu prüfen, ob § 8 EEG (Netzanschlussvorrang für „Grünstromspeicher“) auf alle Energiespeicher ausgeweitet werden soll. Wichtig ist in diesem Zusammenhang, dass eine solche Öffnung nur für Energiespeicher gelten darf, die systemdienlich agieren, also solche, die das System ...
