

Why is Egypt's energy sector struggling?

As fuel shortages heightened in 2014, the country's electricity generating capacity struggled to keep pace with rising energy demand. Egypt's economic development hinges on the energy sector, which represents 13.1% of overall gross domestic product (GDP).

Does Egypt use solar energy?

In 2020, solar energy in Egypt accounted for 1.9% of its total electricity production, making it the second-highest renewable energy source. Egypt is the second country in Africa after South Africa in solar energy utilisation, ranked thirty-first worldwide (IRENA, 2021).

Can wave energy be harnessed in Egypt?

Additionally, Bayoumi and El-Gamal (2010) presented a research plan to extract the wave energy potential and investigated the feasibility of harnessing wave energy in Egypt. This plan presents a map for potential wave energy locations in Egypt.

Does Egypt still rely on conventional energy sources?

According to the rate of increase in the consumption of conventional energy sources in Egypt alongside the CO₂ emissions over the period from 1971 to 2016 (for 47 years as shown in Fig. 1) (The World Bank, 2022), it is evident that Egypt is still relying primarily on the conventional energy resources. Fig. 1.

How much power does Egypt have?

Despite this, according to the most recent annual report issued in 2018 by the Egyptian Electricity Holding Company (EEHC), Egypt's total current installed power generation capacity is around 54.5 GW. Of this total generation capacity, renewable energy accounts only for 10% (IRENA, 2018b).

Where is electricity produced in Egypt?

The hydropower energy is concentrated in Upper Egypt, while wind energy is concentrated on Red Sea Coast. Additionally, bioenergy-based electricity is generated in one place with a capacity of 10 MW in Algalab Alasfar. Similarly, a single solar thermal power plant is under operation, which is located in Al-Kuraymat with a capacity of 20 MW.

In an exclusive interview with the Energy Connects Quarterly Review, H.E. Eng. Karim Badawi, Egypt's newly-appointed Minister of Petroleum and Mineral Resources, shares his vision for the energy sector and

how the country is poised to consolidate its reputation as a leading energy hub. Underscoring the pivotal role of the oil & gas sector to Egypt's ...

8 ????· Egypt has announced an ambitious plan to establish 10 gigawatts of renewable energy capacity by 2028 as part of its National Platform for the NWEF Program. The initiative, ...

Underscoring the pivotal role of the oil & gas sector to Egypt's development, H.E. Badawi explains how it was able to accomplish major successes geared towards achieving Egypt 2030 Vision, unlocking the sector's investment potential, ensuring energy security, and achieving financial sustainability.

demand, the Egyptian government has pursued an energy diversification strategy, known as the Integrated Sustainable Energy Strategy (ISES) to 2035, to ensure the continuous security and stability of the country's energy supply. This strategy involves stepping up the development of renewable energy and energy

Most of the available hydropower energy resources in Egypt are being exploited; the share of hydropower in primary energy consumption reached 0.12 EJ in 2019. ... Conducting an information campaign to raise awareness of the nuclear programme in order to explain its objectives and plans and to respond to the allegations made by groups opposing ...

Egypt: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Although Egypt strengthened social protection, expanded existing programs and introduced key poverty mitigation measures during the early stages of the COVID-19 pandemic, increasing inflationary pressures call for further intensification of efforts to ...

At present, Egypt has set an ambitious objective of achieving 42% of its energy generation capacity from renewable sources by 2035 (known as the 2035 energy target) (IRENA, 2018b). To better exploit the RE potential in Egypt, a few review studies have covered different aspects of RE technologies.

Egypt's energy saving potential is very difficult to quantify, partly due to the limited availability of data on energy consumption by subsectors and industrial processes. However, ... energy auditing, awareness program and demonstration project. But OEP ceased function in 2005.

Egypt relied on fossil fuels for 88% of its electricity in 2023. Its per capita emissions are lower than the global average. Egypt's largest clean electricity source is hydro (7%). Wind and solar are starting to grow, comprising 5% of the country's electricity in 2023, up from just 1% in 2015.

Egypt: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country

across all of the key ...

In November 2022, El Molla stated that Egypt has a strategy to accelerate access to new and renewable energy to contribute 42% to the energy mix in Egypt by 2030, as it was planned to reach this goal in 2035. This comes as Egypt is committed to climate action, especially after hosting COP 27 climate summit in 2022.

The increase in Egypt's average temperatures has accelerated during the past two decades, dramatically raising energy demand for cooling during the summer. Climate projections show that Egypt will experience a higher level of warming than the world average by 2100 and face a significant increase in electricity demand due to more frequent ...

TOPLINE ENERGY STATS FOR EGYPT Energy sector represents 13.1% of overall GDP Energy consumption per capita was at 0.97 toe, including 1 550 kWh of electricity (2019) Households absorb 41% of energy consumption, followed by industry (29%) and services (20%) (2019) CO2 emissions from fuel combustion declined by 2% in 2019, to 237 MtCO2

Egypt Energy Brief, Issue 394. 2023-12-13. NDC profits still up in 9M 2023. 2023-12-12. AEDC said to award SEI another switchboard contract. 2023-12-12. Ministry plans five LNG shipments by year-end. 2023-12-12. Updates reported on Soda Ash project finance, works. 2023-12-12.
