

Why is Egypt launching a 500 million solar plant in Aswan?

Egypt inaugurated a \$500 million solar plant in the southern city of Aswan on Saturday as part of its push to boost renewable energy production after last summer's severe power outages. The Abydos Solar PV Plant, which was developed by Dubai-based energy company AMEA Power, has a capacity of 500 megawatts and was completed in just 18 months.

Where can solar power be developed in Egypt?

Utility-scale PV development has, thus far, clustered around Aswan in the south of the country, where solar resources are strongest and there is plenty of land for development. The biggest chunk of Egyptian solar capacity is provided by the Benban project, which lies 50 km from Aswan and is one of the world's biggest PV sites.

Where can I install OneStep solar sets?

OneStep. Solar sets you can install... You can install our sets on a balcony, wall, railing, or in the garden. Why OneStep. Solar sets? Efficiency for decades Increased energy production and enhanced durability, thanks to innovative module and microinverter technologies from industry-leading manufacturers.

Is Egypt a good place for solar power?

The International Energy Agency (IEA) reckons Egypt is one of the world's best regions for solar. Some companies agree, having invested in projects such as the Benban solar park, one of the world's largest, 650km (400 miles) south of Cairo. Egypt's government has also tried to boost rooftop solar power by offering homeowners generous incentives.

Does Egypt have solar power?

Egypt's government has also tried to boost rooftop solar power by offering homeowners generous incentives. Yet even though Egypt will host this year's international summit on climate change, its dirtier sources of energy continue to overshadow the solar sort. Listen to this story. Enjoy more audio and podcasts on iOS or Android.

Should Egypt install its own solar power?

Egypt's government has found it hard to convince its citizens of the merits of installing their own solar power. In 2014 it introduced a "feed-in" tariff, promising to pay homeowners and companies for surplus solar power they produce. Yet eight years later only a paltry 749 rooftop solar units have been installed.
