

What is HK Electric's mobile battery energy storage system?

On September 6, 2023, the ceremony of the mobile electricity supply system at HK Electric's Cyberport Switching was successfully held, which marked that the SCU 250KW/576KWh vehicle-mounted mobile battery energy storage system was officially put into operation at HK Electric's Cyberport Switching Station. The system is a technology that combines...

Who is Xinyi electric storage?

Xinyi Electric Storage was listed in the Hong Kong Stock Exchange in July 2016, formerly known as Xinyi Automobile Glass Hong Kong Enterprise Co., Ltd., and now it has been strategically transformed into a comprehensive new energy solution provider. Start to be an integrated supplier of industrial and commercial energy storage systems.

What is HK Electric's Cyberport switching station?

HK Electric's Cyberport Switching Station (HK Electric) is mainly responsible for the power generation, transmission and distribution of Hong Kong Island and Lamma Island. With the increasing demand for electricity in Hong Kong in recent years, the original power reserve cannot meet the development needs of enterprises.

Do electric vehicles need energy storage?

In the future, electric vehicles and large renewable storage systems also require an efficient energy storage medium. Capacity and energy density are of course important aspects of battery materials, but equally important are the stability of the materials and their interactions with electrolyte.

SEC

Our Energy Storage System stores energy in water-based electrolyte, which is inherently safe, low cost, long-life, highly scalable, and eco-friendly. The system can store renewable energy and grid electricity to ensure efficient energy usage.

The system includes a lithium battery energy storage system, energy storage converter, air conditioner, fire protection, and vehicle-mounted box. The energy storage vehicle has a configuration capacity of 576kWh and an output power of 250KW, which can meet the power supply requirement of a 250kW load for 2 hours.

Co-founded by electric visionaries Brandon Ng and Luca Valente and based in Hong Kong, Ampd designs, engineers, and makes state-of-the-art, grid-connected energy storage systems. The company's Ampd Silo is on the cutting edge of energy storage. It uses 1,792 Li-ion batteries to store on-grid energy and can deliver backup power instantaneously.
