

Is the Democratic Republic of the Congo an energy exporter?

One of the Inga dams, a major source of hydroelectricity in the Democratic Republic of the Congo. The Democratic Republic of the Congo was a net energy exporter in 2008. Most energy was consumed domestically in 2008. According to the IEA statistics the energy export was in 2008 small and less than from the Republic of Congo.

What certificate does Congo energy have?

Congo Energy has the certificate issued by ARSP (Autorit#233; de R#233;gulation de la sous-traitance dans le secteur priv#233;). This certificate certifies that Congo Energy is authorized to work as a subcontractor in the Democratic Republic of Congo. Congo Energy strives to provide its partners and customers with high-quality products and services.

How much electricity does the DR Congo import?

The DR Congo imported 78 million kWh of electricity in 2007. The DR Congo is also an exporter of electric power. In 2003, electric power exports came to 1.3 TWh, with power transmitted to the Republic of Congo and its capital, Brazzaville, as well as to Zambia and South Africa.

What does Congo energy do?

The company focuses on 4 areas: Electrical infrastructure for industries. Congo Energy designs, produces and installs bespoke infrastructure. The company is proficient in the latest innovations in the sector, which allows it to produce efficient installations using cutting-edge technology. All at a competitive price.

How can Altech help DR Congo fight electrification?

To help tackle the challenge of electrification, Altech, the DR Congo's market leader in the distribution of world-class clean energy products and services, are deepening their last-mile distribution efforts to provide clean, affordable energy for conflict-affected people in the Democratic Republic of the Congo.

What is the energy potential of the DRC?

The DRC has immense and varied energy potential, consisting of non-renewable resources, including oil, natural gas, and uranium, as well as renewable energy sources, including hydroelectric, biomass, solar, and geothermal power.

The GDRC welcomes developers to supply power, build the transmission lines, or sell the necessary equipment. There is also a tremendous need for off-grid electric solutions. Along with hydroelectric power, the GDRC seeks to build and rehabilitate several geothermal stations across the country.
