

What is French Polynesia's energy transition plan?

French Polynesia's energy transition plan has three main objectives: Change the energy model, by gradually replacing the use of fossil fuels with renewable energies in all activities

How much electricity does French Polynesia use?

Hydroelectricity accounts for 23% of the electricity mix in French Polynesia. It is the first renewable energy source in French Polynesia with an installed capacity of 49.3 MW. Solar water heaters produce hot water using solar energy. In 2019, the electricity consumption saved is approximately 22 GWh, i.e. 3% of electricity consumption.

Does French Polynesia rely on hydrocarbons?

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.

Is biomass a source of electricity in French Polynesia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. French Polynesia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What is PEC in French Polynesia?

In French Polynesia, mainly crude oil and its derivatives, hydraulic power and solar radiation PEC is expressed in tonnes of oil equivalent (toe), unit that allows the different energies to be compared in relation to their intrinsic characteristics. litres of hydrocarbons were imported in 2019 in French Polynesia. is the dependency rate.

Onshore wind: Potential wind power density (W/m²) is shown in the seven classes used by NREL, measured at a height of 100m. The bar chart shows the distribution of the country's land area in each of these classes compared to the global distribution of wind resources. Areas in the third class or above are considered to be a good wind resource.

AFD and the Polynesian authorities have jointly defined a support program to assist French Polynesia with its energy transition. By 2030, the renewable energy penetration rate in power ...

The power sockets in French Polynesia are of type A, B and E. The standard voltage is 110 / 220 V at a frequency of 60 / 50 Hz. You need a power plug (travel) adapter in French Polynesia. Other languages. Espagnol. Francais. Deutsch. Nederlands. Power Plugs & Sockets of the World.

French Polynesia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

IN FRENCH POLYNESIA: 2019 EDITION FOCUS ON PRIMARY ENERGY CONSUMPTION % 83 10.2 ktoe = e t a r 1.9 ktoe c n 0.6% d n e consumption 19.3 ktoe e D 6.1% 0.3 ktoe 0.1% Fuel p e y 9 . The Papenoo Hydroelectric Power Station is located near the commune of Papenoo on the island Tahiti in the overseas country of France, French Polynesia. It has an installed capacity of 28 MW and was constructed between 1989 and 1994. The hydroelectric power station is owned by Electricite de Tahiti SA. It is the largest hydroelectric power ...

In French Polynesia, mainly crude oil and its derivatives, hydraulic power and solar radiation PEC is expressed in tonnes of oil equivalent (toe), unit that allows the different energies to be compared in relation to their intrinsic characteristics.

To this end, we present the wind characteristics at six selected locations in Tahiti. Surface wind observations from 2008 to 2020 obtained from the Meteorological Service of French Polynesia are analysed in terms of wind speed, dominant wind direction and power density to identify the most suitable locations for the deployment of wind farms.

AFD and the Polynesian authorities have jointly defined a support program to assist French Polynesia with its energy transition. By 2030, the renewable energy penetration rate in power generation will reach about 75%.

French Polynesia, with its azure lagoons, lush landscapes, and overwater bungalows, beckons travelers seeking a tropical escape. From the iconic landscapes of Bora Bora to the lesser-known Rangiroa, here are the 14 ...

To this end, we present the wind characteristics at six selected locations in Tahiti. Surface wind observations from 2008 to 2020 obtained from the Meteorological Service of French Polynesia are analysed in terms of wind ...

In French Polynesia, mainly crude oil and its derivatives, hydraulic power and solar radiation PEC is expressed in tonnes of oil equivalent (toe), unit that allows the different energies to be ...

All power sockets in French Polynesia provide a standard voltage of 110V & 220V with a standard frequency of 50Hz. You can use all your equipment in French Polynesia if the outlet voltage in your own country is between 100V-240V. ...

Season 2 of Power Slap: Road To The Title is underway and already off to a wild start. Catch up on everything that's happened on the groundbreaking reality show on Rumble and on PowerSlap .. Episode 3 started with an up-close look ...

French Polynesia Adapter Plug Set adapts your appliance plugs to fit into French Polynesia wall outlets. ...
French Polynesia Travel Power Strip Features: Complete 3 Line Surge Protection; Dual Voltage 100 - 240 VAC; Three AC outlets Input/Output 100 - 240 VAC, 50/60 Hz; Max load 15A;

Approximately 30% of electricity is generated renewably, primarily Hydroelectricity and solar power. [1] Renewable generation is concentrated on Tahiti, with other parts of French Polynesia almost entirely reliant on fossil fuels. [2] Wind power is not used, with only two small facilities, both of which became non-functional due to lack of ...
