

Endesa Generaci&#243;n Portugal, part of Enel Group, has been award the connection rights to develop a renewable energy project combining solar, wind, green hydrogen and a 168.6MW battery energy storage system ...

We are pleased to announce the creation of the Lisbon Unit for Learning and Intelligent Systems (LUM LIS), a unit of the European Laboratory for Learning and Intelligent Systems (ELLIS), hosted at the Instituto Superior T&#233;cnico (IST) of the University of Lisbon (UL).

The European Comission through the Innovation Fund program has recognized the innovative character of EDP's project to build one of the largest battery systems in Europe connected to a ...

The European Comission through the Innovation Fund program has recognized the innovative character of EDP's project to build one of the largest battery systems in Europe connected to a combined cycle power plant.

EDP now owns 540 MWp of solar capacity in Portugal, a technology crucial for the country's energy transition. This milestone was achieved with the commissioning of EDP Renewables' largest solar plant in Europe, located in the Lisbon district.

Endesa Generaci&#243;n Portugal, part of Enel Group, has been award the connection rights to develop a renewable energy project combining solar, wind, green hydrogen and a 168.6MW battery energy storage system (BESS) ...

EDP now owns 540 MWp of solar capacity in Portugal, a technology crucial for the country's energy transition. This milestone was achieved with the commissioning of EDP Renewables' largest solar plant in Europe, located in ...

EDP Renewables, a leading global player in the development of wind and solar projects, has commissioned Portugal's second hybrid park that combines wind and solar energy in the same location, practically doubling the capacity for renewable electricity production in ...

EDP Renewables, a leading global player in the development of wind and solar projects, has commissioned Portugal's second hybrid park that combines wind and solar energy in the same location, practically doubling the ...

The wind farm started operating in 2010 and initially had 72 wind turbines and an installed capacity of 165.6 MW, making it already one of the largest operating wind farms in Portugal.

EDP now owns 540 MWp of solar capacity in Portugal, a technology crucial for the country's energy transition. This milestone was achieved with the commissioning of EDP Renewables" ...
