The site area is 110,000 m², of which 15,000 m² are Production and Warehouse, 1,000 m² Offices and the remaining area for logistics and new buildings. ...

The award-winning Enact software platform is designed to transform and accelerate the implementation of clean energy globally. Enact is the only two-sided platform that allows customers- both homes and businesses- to simplify their entire solar and energy storage purchase, designed on Enact and delivered by local solar professionals.

While the optimal direction for solar installations is generally south, the Enact platform offers East-West configuration for installers in European markets, like the United Kingdom, Germany or Italy. East-West configuration is significant for installers for several reasons, particularly for installers designing for locations with limited space or flat roofs.
