Guinea Bissau: Power Sector Policy Note . E. XECUTIVE SUMMARY. ... (PV) plants will help reduce the average cost of electricity in the country and diversify the energy mix, while battery storage will help integrate this variable energy source into the grid. In Bafata, Gabu and Cacheu, the PV plants will provide cheaper and cleaner local power ...

The deep history of what is now Guinea-Bissau is poorly understood by historians. The earliest inhabitants were the Jola, Papel, Manjak, Balanta, and Biafada peoples. [citation needed] Later the Mandinka and Fulani migrated into the region, in the 13th and 15th centuries, respectively.They pushed the earlier inhabitants towards the coast and onto the Bijagos islands.

The World Bank has announced that it will support the development of Guinea-Bissau's first solar power plants. Like other West African countries, Bissau wants to use this solution to decarbonise its electricity production and accelerate the electrification of its population. Guinea-Bissau wants to integrate solar energy into its electricity mix.
