

Where are silfab solar panels made?

Silfab Solar is a privately-held solar company based in Ontario, but the company actually has more employees in the United States. In the U.S., the company manufactures solar panels at two facilities in Washington with a combined manufacturing capacity of 800 megawatts (MW).

Who makes CertainTeed solar panels?

Located outside Philadelphia, this Saint-Gobain SA subsidiary is known for its industry-leading sustainable building materials. CertainTeed entered the U.S. solar market this year with two aesthetically pleasing all-black modules: the 400-440W Solstice Panel and the 70-watt Solstice Shingle. Both products come with a 25-year warranty.

Who makes qcells solar panels?

Qcells (formerly Hanwha Q CELLS), which was founded in 1999, is a subsidiary of South Korea-based Hanwha Solutions with a regional headquarters office in Irvine, California. It currently supplies more residential solar panels in the U.S. than any other company.

Where are Enphase panels made?

Enphase's manufacturing is contracted out to third-party factories in Wisconsin (Foxconn) and South Carolina (Flex), according to the DOE. All that said, the bulk of panels and components are not built in America. Even though the American-made panels listed above are assembled here, many of the components still come from abroad.
