

Where is Ener1 made?

Headquartered in Indianapolis, Indiana, the company has manufacturing locations in the United States and Korea. Ener1 also develops commercial fuel cell products and nanotechnology -based materials. Ener1 filed for Chapter 11 bankruptcy protection on January 26, 2012.

What does Ener1 do?

Ener1, Inc. designs, builds, and manufactures battery systems. They produce lithium-ion-powered batteries, modules, and storage products, as well as develop fuel-cell products and nanotechnology materials for transportation, grid energy storage, and consumer markets. Ener1 operates in the United States and Korea.

When did Ener1 go out of business?

Ener1 received a \$118.5 million grant from the Department of Energy in 2010 via the American Recovery and Reinvestment Act of 2009. The company traded on the over the counter market under the symbol HEV. It was de-listed from the NASDAQ Stock Market on October 28, 2011 prior to its January 2012 bankruptcy filing.

Did Ener1 go bankrupt?

It would seem that the marketplace agreed. In announcing its Chapter 11 bankruptcy yesterday, Ener1's CEO, Alex Sorkin, acknowledged, "Our business plan was impacted when demand for lithium-ion batteries slowed due to lower-than-expected adoption for electric passenger vehicles."

Is Ener1 about to become a successful nanotechnology company?

Learn more about IEEE -> It's hard to deny that when Ener1 announced that it had built "a pilot nanotechnology-based manufacturing facility to fabricate electrodes for high discharge rate, lithium-ion batteries" that it sounded like we were about to witness a new successful nanotechnology company.
