

On top of helping residents keep the lights on when municipal energy generation goes offline, broad adoption of the types of batteries eligible for the VIBES rebate will help to strengthen the resiliency of the territory's overall electrical grid and one day may reduce the number of blackouts.

Honeywell Process Solutions announced it will provide Massachusetts-based renewable energy developer VIElectron with its first installment of battery energy storage systems (BESS) to accommodate six ...

The installment of battery energy storage solutions (BESS) in six solar parks across the U.S. Virgin Islands has begun. The solar array and BESS will boost the islands' decarbonization efforts by fulfilling 30% of its energy consumption through renewable sources.

Honeywell Process Solutions announced it will provide Massachusetts-based renewable energy developer VIElectron with its first installment of battery energy storage systems (BESS) to accommodate six solar facilities across the U.S. Virgin Islands (St. Thomas, St. ...

This visionary partnership is set to transform the energy landscape of the US Virgin Islands through the deployment of cutting-edge Battery Energy Storage Solutions (BESS) across six strategically positioned solar parks.

VIBES is federally funded through the State Energy Program Bipartisan Infrastructure Law (SEPIL), and is a rebate program that aims to limit the disruption that each power outage causes to daily life in the territory.

The program is effective for purchases made on or after October 1st, 2023, and it aims to incentivize the adoption of electric vehicles (EVs) and electric bicycles (e-bikes) by offering substantial rebates to residents of the US Virgin Islands.

Residents of the U.S. Virgin Islands can now receive larger rebates and install bigger battery systems, with new support reaching up to \$6,000 to help enhance power resilience during...

lowering the cost barrier to adoption of battery energy storage options. The program will afford residents the opportunity to increase their energy resiliency and bridge gaps in utility services in the U.S. Virgin Islands.

Launched this May, the federally funded rebate program aims to help Virgin Islands residents defray the cost of investing in energy storage solutions that can switch on automatically in the event of a power outage.
