

Is Tajikistan part of EU4Energy?

Tajikistan is one of the focus countries of the EU4Energy programme, which is being implemented by the IEA and the European Union along with the Energy Community Secretariat and the Energy Charter Secretariat.

What is the IEA energy sector review of Tajikistan?

IEA. All rights reserved. This International Energy Agency (IEA) energy sector review of Tajikistan was conducted under the auspices of the EU4Energy programme, which is being implemented by the IEA and the European Union, along with the Energy Community Secretariat and the Energy Charter Secretariat.

What is the energy system in Tajikistan?

Tajikistan's energy system depends primarily on hydroelectricity, coal and oil. Hydropower and coal are produced domestically whereas virtually all oil and gas must be imported to meet the demand. This also explains the high share of electricity in final consumption, as well as the increasing use of coal in both transformation and industries.

What is Tajikistan's energy policy?

Electricity is an integral part of Tajikistan's economy, and its energy policy continues to focus primarily on alleviating annual winter shortages and providing the population with uninterrupted access to energy since its independence.

Is there a market for Energy Services in Tajikistan?

At the same time, the EBRD has also opened a credit line for citizens who want to implement energy-efficient technologies in their own homes (EBRD, 2017). A market for energy services and ESCOs does not currently exist in Tajikistan.

Why is energy security important in Tajikistan?

Energy security in Tajikistan is critically unstable and therefore of central concern for the government. The country relies on hydropower for nearly all its electricity needs, but seasonal generation volatility means that there is a surplus of electricity during the summer and a shortfall during the winter.

This International Energy Agency (IEA) energy sector review of Tajikistan was conducted under the auspices of the EU4Energy programme, which is being implemented by the IEA and the European Union, along with the Energy Community Secretariat and the...
