

What does the Danish Energy Agency do?

Read more about our work. The Danish Energy Agency's Global Cooperation partner with other countries and share the Danish experiences on shaping an energy system that combines a green, low-carbon and reliable energy supply with economic growth. Geographically the energy partnerships cover 24 countries around the world.

What is Denmark's energy policy?

The Energy Agreement from 2012 provides the overall framework for the Danish energy policy. According to the agreement, Denmark must have reduced total energy consumption by seven percent in 2020, compared to the energy consumption in 2010.

Do you need an Energy Performance Certificate in Denmark?

In Denmark, it is mandatory to have an energy performance certificate (EPC) when selling or renting out buildings. When a building is energy-labelled, it is inspected and measured by an energy consultant. On this basis, the energy consultant calculates the building's energy consumption.

How can Denmark reduce its energy consumption?

Today, almost 40 percent of Denmark's total energy consumption is related to buildings. And there is still significant potential for reducing that consumption. The means of turning the potential into actual savings are, first and foremost, minimum energy performance standards in the building code.

How can SustainableEnergy help a sustainable society in Denmark?

A fundamental principle of SustainableEnergy's work for a sustainable society in Denmark as well as abroad is that this cannot be achieved by only applying a set of appropriate technological innovations.

What is Denmark's energy source?

More than two-thirds of Denmark's renewable energy comes from bioenergy, which is energy stored in organic material or biomass. Agriculture is big business in Denmark, and it indirectly helps provide energy too, with manure, animal fats, and straw used as the basis for biogas and liquid biofuels.

The total Danish export of energy technology was DKK 71.4 billion in 2015, which is a decrease of 4 pct. compared to 2014. The export of energy technology was 11 pct. of the total Danish export in 2015. That puts Denmark in front within the EU when it comes to the share of energy technology of total exports of goods.

In 1973, Denmark became the first country in the world to implement an environmental law, and since then, the environment has become one of the main priorities of city planning in the country.. Denmark's Energy Policy Agreement was signed into law in 2012, and in the newest version of the Agreement, Denmark has committed to 100RE for all electricity in the country by 2030, ...
