

Octopus Energy Group's entech platform Kraken will control domestic assets such as heat pumps, smart meters and other energy tech to automatically reduce bills for Belgian households. The platform has been licensed by energy solutions provider Noven to save Belgian households from costly peak energy costs, through a mix of smart home and ...

The study "Belgian Sustainable Building Solutions and Smart Cities 2020" explains Belgium's pioneering role in sustainable building and smart cities. In particular, with a view to achieving the objective of carbon neutrality by 2050 set by the European Green Deal, Belgium is resolutely pursuing the path of urban sustainability through ...

Europe is facing an unprecedented energy price and supply crisis. Deploying smart energy solutions and unleashing the power of energy data can have a positive impact on savings and ...

EnergyVille is a collaboration between the Flemish research partners VITO, KU Leuven, imec and UHasselt in the field of sustainable energy and intelligent energy systems. Our researchers provide expertise to industry and public authorities on energy-efficient buildings and intelligent networks for a sustainable urban environment.

Luminus Solutions offers tailor-made solutions to guide buildings and industry through the energy transition. Using less energy, optimising energy processes and utilising all energy flows, producing your own energy, electrification, ...

Luminus Solutions offers tailor-made solutions to guide buildings and industry through the energy transition. Using less energy, optimising energy processes and utilising all energy flows, producing your own energy, electrification, ensuring continuous power quality... all smart ways to prepare your company for a carbon-neutral future .

The astonishing solution delivered by Iskraemeco brings new Energy IoT technologies to Belgium's grid operator Arewal in order to facilitate sustainable and smart transitions of its electricity network. Iskraemeco combines select components of its cutting-edge solution providing smart meters based on NB-IoT communication and a HES and MDM software platform.

Octopus Energy Group's entech platform Kraken will control domestic assets such as heat pumps, smart meters and other energy tech to automatically reduce bills for Belgian households. The platform has been ...

The astonishing solution delivered by Iskraemeco brings new Energy IoT technologies to Belgium's grid operator Arewal in order to facilitate sustainable and smart transitions of its ...

Europe is facing an unprecedented energy price and supply crisis. Deploying smart energy solutions and unleashing the power of energy data can have a positive impact on savings and consumer bills. This needs to be fully recognised as part of the solution and reflected in the forthcoming RePowerEU Plan (May 2022) and Digitalisation of Energy Action

Supporting solutions for energy efficient buildings. Windows and walls can be built to collect, store, reflect and even distribute solar energy in the form of heat during winter. In the summer, they can reject solar heat. However, there are smarter ways to improve the energy efficiency of buildings.

ESMIG is the European association of smart energy solution providers. Our members, ranging from small to multinational companies, develop and manufacture devices, information technologies and services for multi-commodity metering, display and management of energy production and consumption.

Belgium Volt leads the charge in on-demand smart energy solutions, seamlessly integrating cutting-edge technologies for efficient energy management. Our innovative approach empowers users with dynamic control, adapting to their needs and contributing to ...

Detailed info and reviews on 9 top Energy Efficiency companies and startups in Belgium in 2024. Get the latest updates on their products, jobs, funding, investors, founders and more.
