

Island Eco is a social entrepreneurship, doing business and implementing projects in rural electrification and renewable energy in the Marshall Islands since 2001. Its mission and the goals are in line with the National Energy Plan, which strives for 20% of energy to come from renewable sources by 2020.

We are a boutique energy investment company headquartered in Company Complex, Ajeltake, Majuro, Marshall Islands. Founded by a team of young experts from over 10 countries, we specialize in identifying lucrative investment opportunities in the energy sector, especially within Latin America and Europe.

Building and maintaining renewable energy in the Marshall Islands will help create jobs and improve the health of the population. Renewable energy systems will allow for more affordable and safer access to electricity.

The RMI Electricity Roadmap project aims to develop a comprehensive framework to help the Republic of the Marshall Islands (RMI) achieve its energy and climate change targets by identifying investments, policies, and financing options for the electricity sector.
