

How does the private sector provide energy and digital services in Madagascar?

With the exception of the national electricity company JIRAMA, energy and digital services in Madagascar are provided by the private sector. Low population densities and high poverty levels in most of the underserved areas make it impossible for the private sector to deliver these services on a purely commercial basis.

How many people in Madagascar lack electricity?

Over 18 million people currently lack electricity access, placing Madagascar 13th in the list of countries with the largest unelectrified population worldwide. In terms of connectivity and accessibility of broadband services, despite progress in recent years, Madagascar ranks relatively low.

What is the energy sector policy in Madagascar?

Flowchart of the energy sector policy in Madagascar. As shown in Fig. 1, the energy sector policy is divided in two main strategies, namely: the institutional reform and public-private partnership.

Which energy process is available in Madagascar?

As no energy process for Madagascar is available, we considered the generic ones, for fuel oil steam turbine and diesel combustible engine and hydrodam power plant. Reflecting Malagasy conditions and the efficiencies, transport of raw materials have been included in the process.

Does Madagascar have electricity?

Access to infrastructure in Madagascar, including electricity and digital, is among the lowest in Sub-Saharan Africa and in the world. An estimated 33.7% of the population has access to electricity, compared to an average of 48.4% for Sub-Saharan Africa in 2020.

What is Madagascar's energy mix?

In 2019, Madagascar's energy mix was dominated by biofuels and wastes (85%), with oil products (11%), coal and hydro accounting for the rest of the total energy supply. In 2020, less than 5% of the population had access to clean cooking and 27% had access to electricity.

In 2019, Madagascar's energy mix was dominated by biofuels and wastes (85%), with oil products (11%), coal and hydro accounting for the rest of the total energy supply. In 2020, less than 5% of the population had access to clean cooking ...
