

Why should you choose EnerSys®; powersafe®; SBS®; XC+?

1. Introduction The EnerSys®; PowerSafe®; SBS®; XC+ range of valve regulated lead acid cells and monoblocs is designed to meet today's challenging demands of unreliable grid applications resulting from aging infrastructure, changing climate and reduced dependence on existing fossil fuel generation to name a few.

Can a powersafe SBS XC+ battery be topped up with water?

PowerSafe SBS XC+cells and monoblocs are classed as VRLA batteries and do not have to be topped up with water. Do not open or remove the valve. Opening could cause lasting damage to the battery and is prohibited. The containers and lids should be kept dry and free from dust.

What is a powersafe V battery?

The batteries provide a long service life and a high performance rate while occupying less space than conventional standby power batteries. PowerSafe V batteries are constructed with V-0 rated,flame-retardant,ABS plasticfor thick wall containers and covers,combining high mechanical strength with excellent safety features.

What is powersafe SBS XC+?

PowerSafe SBS XC+is designed for unreliable grid applicationswhere the grid is unstable,with frequent power outages,and typically where the battery is operated in warm ambient temperature with uncontrolled cyclic use.

3. Storage Monoblocs and cells lose capacity when standing on open-circuit because of parasitic chemical reactions.
